

Please pray for our recent national trainees. In addition to Bible translation, our group is also involved in literacy and scripture use (Bible studies, etc.) projects. On and off during the past two years people from various language groups to the north have been receiving training in these areas at our training center near the Burmese border. It was during my most recent trip to this center that many of these people completed the courses and workshops and are now ready to go home and train their own people in their own language. They will be working with many non-believers, so please pray for them as they help their communities through literacy and scripture use training. They are very grateful that we are helping their communities by providing this training for them.

Northern Training Center

There are many other translation projects and workshops going on at our training center. My role at this location is to keep the computers, printers, scanners, and network up and running. This can sometimes be challenging given the old computers, the hot, humid weather, and computer viruses. When I am there I also help the students with various computer issues they may be having while creating their booklets. Even though I only travel there about once every 6 weeks, it is encouraging to be a part of the work there.

During this recent trip we were invited to a local church for dinner to thank us for providing these workshops. It was the smallest church building I'd ever been in. The people were very generous and the meal was delicious.

Thank you for your prayer and financial partnership in helping these ethnic groups.
